ABOUT

D-IV Informatics Engineering student at Politeknik Negeri Malang focused on software engineering, AI/LLM integration, and machine learning. Experienced in building full-stack web applications, integrating token-based AI APIs with asynchronous queues and WebSockets, designing n8n workflow automations, and developing NLP classification models. Passionate about transforming practical ideas into functional, high-performance software.

EDUCATION

Politeknik Negeri Malang • D-IV Teknik Informatika — 2024 – Present

Malang, Indonesia | Relevant Coursework: Advanced Web Programming, Data Structures & Algorithms, Machine Learning, Computer Vision.

EXPERIENCE

Web Developer Intern • LPTI Pelataran Mataram — Dec 2025 – Jan 2026; Jul – Sep 2026

- Developed functional web features with AI-assisted coding tools, accelerating feature delivery and sprint cycles.
- Translated technical requirements into modular application components and reviewed generated code for architectural standards.

Vice Head – Game Development Division • Workshop Riset Informatika — Feb 2025 – Feb 2026

- Coordinated division activities, internal research programs, and supported members' technical learning and project development.

3D Art Mentor • Workshop Riset Informatika — Aug 2025 – Nov 2025

- Mentored members in 3D modeling fundamentals, texturing, and asset preparation pipelines with constructive reviews.

PROJECTS

Nalarin.ai – AI-Powered Learning Platform — github.com/M-Aqilaz/Nalarin.ai

Tech: Laravel 13, PHP 8.3, OpenRouter/OpenAI API, MySQL, Laravel Reverb (WebSockets), Queue Worker, Tailwind CSS

Integrated token-based LLM APIs for contextual AI tutor chats, automated summaries, flashcards, and quizzes. Engineered background queue processing (Laravel Queues) for async AI inference and WebSockets (Laravel Reverb) for realtime study rooms.

HoaxCheckML – Machine Learning Hoax News Detection — github.com/M-Aqilaz/HoaxCheckML

Tech: Python, Flask, Scikit-Learn, Pandas, NLP Text Processing, Automated RSS Scraper

Built Indonesian hoax news classification model using NLP. Developed automated RSS aggregator from verified national sources (Antara, CNN, CNBC) for ground-truth dataset curation with interactive Flask dashboard.

InterSelf – Gamified Self-Improvement Web App — github.com/M-Aqilaz/InterSelf

Tech: Next.js 16, TypeScript, React 19, Prisma ORM, Tailwind CSS

Full-stack productivity web app with streaks, daily quests, boss battles, and leaderboards using Prisma ORM.

TECHNICAL SKILLS

Programming: Python, PHP, TypeScript, JavaScript, Java, SQL, HTML5/CSS3

Web & Frameworks: Laravel 13, Next.js 16, React 19, Tailwind CSS, Flask, WebSockets (Laravel Reverb)

AI & Machine Learning: Token-based LLM API Integration, Prompt Engineering, Scikit-Learn, NLP Preprocessing, Pandas

Backend & Database: MySQL, PostgreSQL, Prisma ORM, Laravel Queue (Asynchronous Workers)

Tools & Automation: Git, GitHub, Postman, Docker (Basic / Local Environment), n8n Workflow Automation

Other: Technical Communication, Copywriting, Agile / Scrum Collaboration
