MUHAMMAD AQIL AZAMI

Informatics Engineering Student | Software Development, AI & Automation

Malang, Indonesia • muhaaqil6002@gmail.com • in/muhammad-aqil-azami-10aa28348 • github.com/M-Aqilaz •

m-aqilaz.github.io

ABOUT

D-IV Informatics Engineering student at Politeknik Negeri Malang focused on software engineering, AI/LLM integration, and automated data pipelines. Experienced in building full-stack web applications, designing end-to-end multi-stage n8n automation workflows, and engineering token-based LLM APIs and ML NLP classification models. Passionate about transforming complex data and AI models into functional, high-impact systems.

EDUCATION

Politeknik Negeri Malang • D-IV Teknik Informatika — 2024 – Present

Malang, Indonesia | Relevant Coursework: Advanced Web Programming, Data Structures & Algorithms, Machine Learning, Computer Vision.

EXPERIENCE

Web Developer Intern • LPTI Pelataran Mataram — Dec 2025 – Jan 2026; Jul – Sep 2026

- Developed functional web features with AI-assisted coding tools, accelerating delivery and modular component quality.
- Translated technical requirements into robust application logic and conducted code audits for architectural standards.

Vice Head – Game Development Division • Workshop Riset Informatika — Feb 2025 – Feb 2026

- Coordinated division activities, member technical mentoring, and collaborative project development.

3D Art Mentor • Workshop Riset Informatika — Aug 2025 – Nov 2025

- Mentored members in 3D modeling fundamentals, texturing, and asset preparation pipelines.

FEATURED PROJECTS

MAPECO — Geospatial Intelligence & Automated n8n AI Pipeline — m-aqilaz.github.io

Tech: n8n Workflow Automation, Geospatial Mapping, NLP Sentiment Analysis, Job Queues, Webhooks, MySQL

Built end-to-end intelligence platform: designed multi-stage n8n workflow automating provincial RSS scraping, job queue worker processing, AI text sentiment analysis (1,500+ articles), and database updates with auto-recovery, visualized on an interactive geospatial risk dashboard.

Nalarin.ai – AI-Powered Learning Platform — github.com/M-Aqilaz/Nalarin.ai

Tech: Laravel 13, PHP 8.3, OpenRouter/OpenAI API, MySQL, Laravel Reverb (WebSockets), Queue Worker, Tailwind CSS

Integrated token-based LLM APIs for contextual AI tutor chats, automated summaries, flashcards, and quizzes. Engineered background queue processing (Laravel Queues) for async AI inference and WebSockets (Laravel Reverb) for realtime study rooms.

HoaxCheckML – Machine Learning Hoax News Detection — github.com/M-Aqilaz/HoaxCheckML

Tech: Python, Flask, Scikit-Learn, Pandas, NLP Text Processing, Automated RSS Scraper

Indonesian hoax news detection platform using NLP. Built automated RSS scraper from verified national media (Antara, CNN, CNBC) for ground-truth dataset curation with interactive Flask dashboard.

TECHNICAL SKILLS

Programming:	Python, PHP, TypeScript, JavaScript, Java, SQL, HTML5/CSS3
Web & Frameworks:	Laravel 13, Next.js 16, React 19, Tailwind CSS, Flask, WebSockets (Laravel Reverb)
AI & Machine Learning:	Token-based LLM APIs (OpenRouter), Prompt Engineering, Scikit-Learn, NLP Sentiment Analysis, Pandas
Automation & Pipeline:	n8n Workflow Orchestration, Webhook Triggers, Job Queue Workers, Auto-Recovery Pipelines
Backend & Tools:	Git, GitHub, Postman, MySQL, PostgreSQL, Prisma ORM, Docker (Basic / Environment Setup)
Other:	Technical Communication, Copywriting, Agile / Scrum Collaboration
